

6 reasons for choosing SpotView

Barco has a range of clinical tools that helps radiologists work smarter. SpotView™ is one of the most impactful tools in the bunch. It boosts luminance in a region of interest to increase visibility of small details and speed up workflow. If you haven't tried it yet, here's why you should:

1. Simple to use

You can activate SpotView with a simple keystroke, customizable and programmable to any input device, for seamless integration into your workflow.

2. Analysis made easy

SpotView provides multiple shapes for image analysis and comparison. The spot can be magnified by 2x to unveil the tiniest details. The other modes are ideal for image review and segmentation.

SpotView Mag

Especially helpful when looking at subtle details in pediatric images.

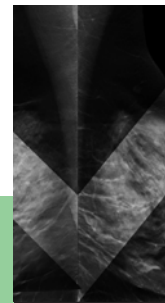

SpotView Invert

Commonly used to visualize the end point for line and tube placement.

SpotView Align

Helps with segmented or sequenced viewing or comparing current vs prior studies.

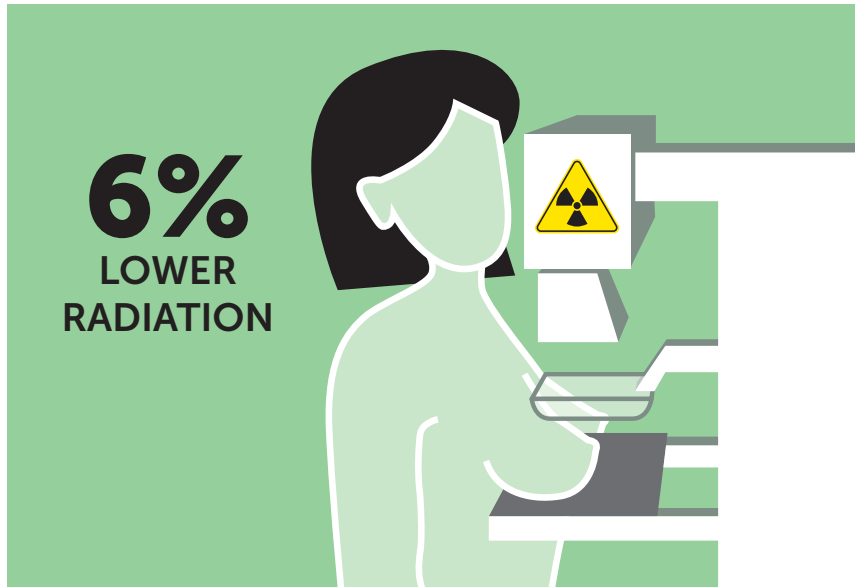

SpotView Align Vee

Ideal for methodical mammography screening.

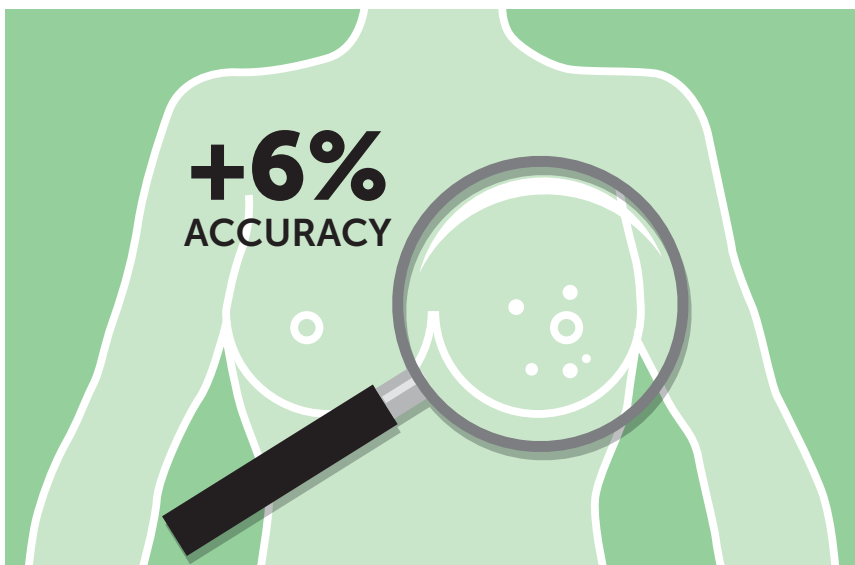

3. Lowers radiation dose

Because SpotView boosts luminance and enhances contrast in a unique way, it may be possible to reduce mammographic dose significantly without impacting diagnostic accuracy.¹

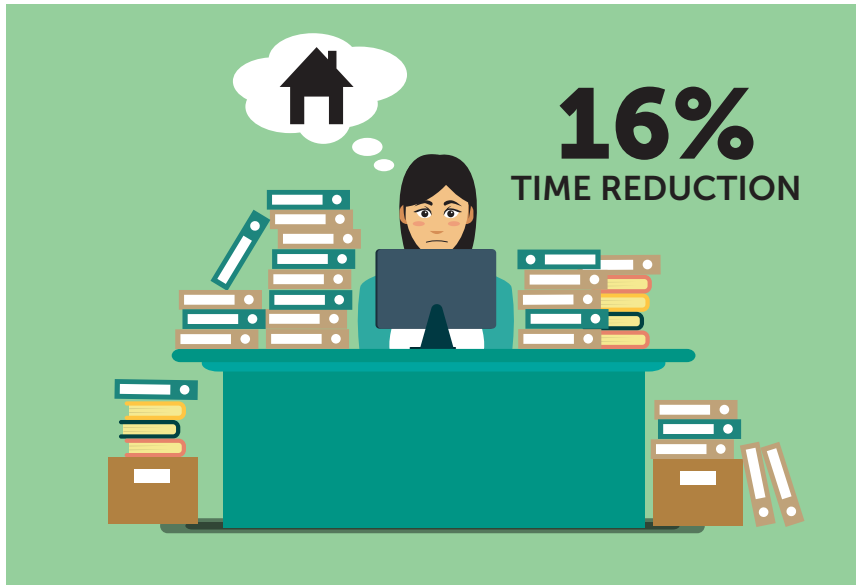

4. Increases reading accuracy

A recent study reveals that radiologists can increase their reading accuracy by 6% when using SpotView.¹ When screening for hard to find cancers, this really makes a difference.

5. Reduces reading time

With SpotView, radiologists can reduce the time spent on reading exams by no less than 16%.¹ This means that they can read more exams each day.

6. Recommended by peers

Many doctors and industry experts recommend SpotView. Here's what they say:

SpotView can decrease errors of perception and I have found it to be helpful in maintaining my focus when scanning patterns are made difficult by distractions or eye fatigue. I have found abnormalities using SpotView even though I thought I had finished searching a case.

Dr. James Ruiz, Radiologist and Breast Imaging Specialist
at Woman's Hospital in Baton Rouge

How do you know?

How do you know if your display system has SpotView? Just check the Barco System Settings control panel. To access the tool, click the arrow to expand your system tray. Look for the Barco icon.

About Barco Healthcare

Improving the quality and value of care are the leading priorities for healthcare professionals today. At a time when the amount of data is growing rapidly and there is more demand for mobility, healthcare systems struggle to work more efficiently, and to provide personalized care to a growing number of patients in an affordable way.

Focused on transforming the delivery of care, Barco connects healthcare professionals at every patient touch point, from the imaging room, to radiology, through specialist consultations and in the surgical suite. We offer a network of medical imaging solutions that deliver the complete picture to support more informed decisions, when and where it matters most.

It's why we are considered the gold standard for medical visualization and how we are there at every stage of the patients' journey. So healthcare professionals can focus on patients' needs and, in the end, achieve the best clinical outcome.
